

HFT™ Technical Data*

Basic installation

- Modules for testing Length, Strength, Micronaire and Colour

Additional Options

- BaleSMART: Software for Bale Management
- G-trash: % by weight

Application Range

- Cotton fibre samples

Measuring Principle

- Length and length uniformity : Optical
- Bundle strength and elongation : CRE Principle
- Micronaire : Airflow
- Colour : Optical

Output Parameters

Numerical Results:

Length properties

- UHML, ML and UI (or) 2.5%, 50% span length and UR

Strength properties

- Bundle strength (g/tex)
- Elongation (%)

Fineness properties

- Micronaire value in micrograms per inch

Colour properties

- % Reflectance (Rd), Degree of Yellowness (+b) and Colour grade

Estimation

- Short Fibre Index (SFI), Maturity Ratio, RiSi and RoSi

Graphical Results:

- Fibrogram and Force Elongation curve

Calibration

- Length, Strength, Micronaire : Instrument calibrated using internationally accepted USDA Cottons
- Colour : USDA Tiles

Ambient Condition

- Relative Humidity : $65 \pm 2\%$
- Temperature : $21 \pm 1^\circ\text{C}$ ($27 \pm 1^\circ\text{C}$ for Tropical Conditions)

Power consumption

- 1.2 kVA

Compressed air consumption

- $24\text{m}^3/\text{hr}$ at 6-7 bar

* Subject to change without Prior notice

HFT™

Semi Automatic High Volume Cotton Tester

PREMIER

premier evolvincs pvt. ltd.

SF No. 79/6, Kulathur Road
Venkitapuram Post

HFT™

Cost Effective High Volume Cotton Tester

PREMIER HFT is a semi automatic High Volume Cotton Tester designed and developed for testing all the important fibre properties

PREMIER HFT Configuration:

- Length and Length Uniformity
- Bundle Strength
- Elongation
- Micronaire
- Colour

Additional Options:

- BaleSMART
- G-trash: % by weight

Latest Generation Optics

Helps to measure accurate Length and its associated parameters

Calibration

PREMIER HFT is supplied with internationally accepted USDA calibration cotton and files for ensuring consistency in the test results

BaleSMART

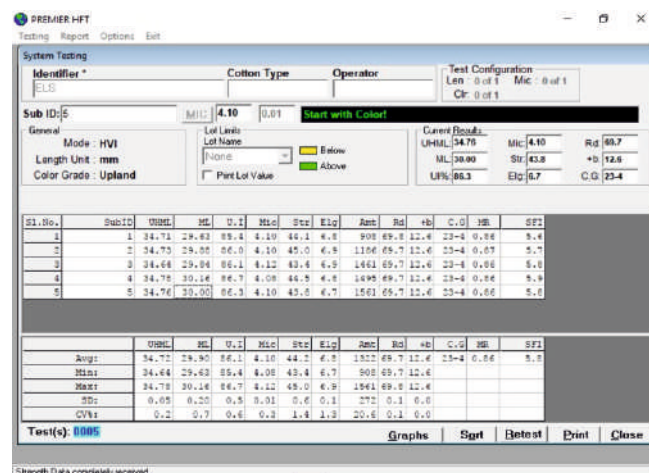

A user friendly application software for Bale Management simplifies the bale lay-down procedure to ensure consistent quality. Plays an important role in the mixing cost

Proven High Volume Cotton Tester

PREMIER HFT, the proven high volume Cotton tester uses USDA Calibration Cotton to assure international standards of precision and accuracy. Length information is reported in Mean length mode popularly practiced across the industry from Ginners, Traders to Spinners and also in Span length mode covering short, medium, long and ELS varieties. The independent module testing of Length, Strength, Micronaire, Colour enables flexibility in choosing the right combination of report for extensive use on a daily basis

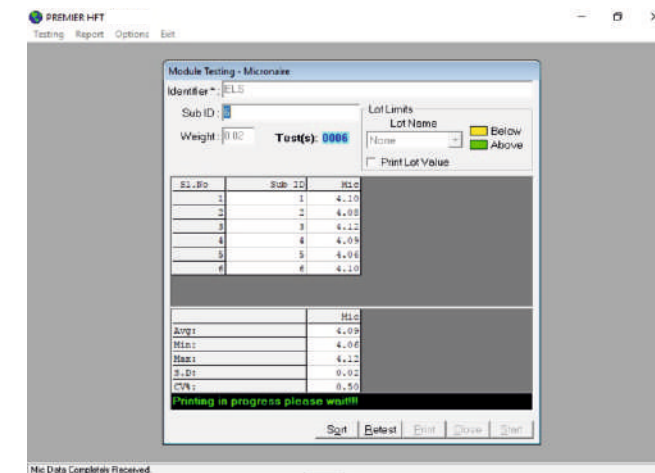

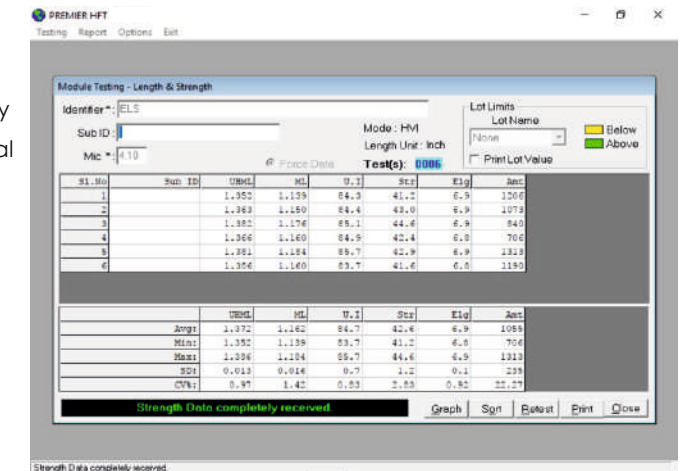

System Testing

- The System testing report provides comprehensive information on Length, Length uniformity, Strength, Elongation, Micronaire and Colour
- Additional information on Maturity, Short fibre and Spinning Index (RiSi and RoSi) helps to evaluate a specific variety during purchase

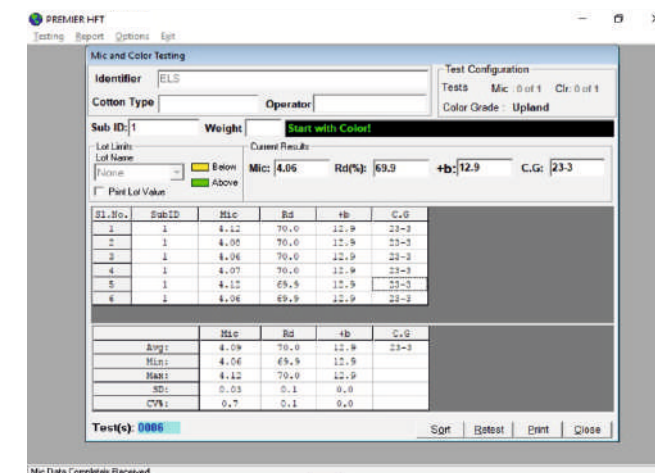

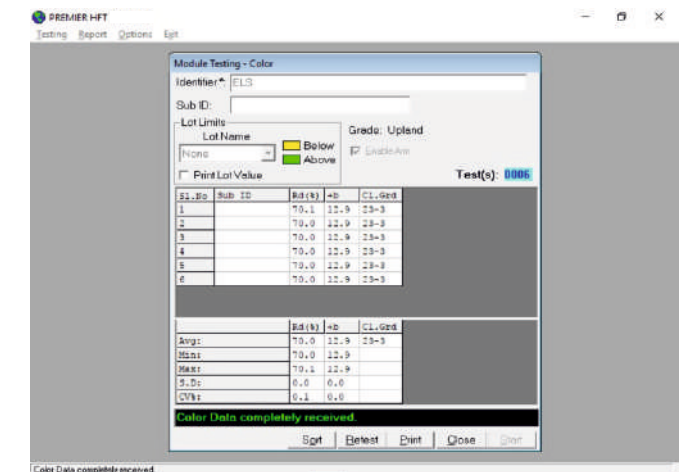

Module Testing: Length & Strength

- Accurate and reliable results on Length, Length Uniformity Strength & Elongation helps to decide on Raw Material purchase
- Quick information helps to allot bales to a Mix based on Length and Strength Results

Module Testing: Colour

- Accurate information on Reflectance (Rd) and Yellowness (+b) helps the user to optimise Mix and Bale Lay-down for a given lot

Module Testing: Micronaire

- Micronaire, in most cases vary widely even within a station, which necessitates bale to bale testing
- Instantaneous information on Micronaire enables to test each bale thereby to optimise Mix on a daily basis

Module Testing: Micronaire and Colour

- A combined report on Micronaire and Colour provides immediate information & greater flexibility to choose the bales
